

ACSC brings you

AZURE VMWARE SOLUTION (AVS)

We help you seamlessly EVACUATE, EXTEND, PROTECT and MODERNIZE your VMware workload from your local datacenter to Azure cloud hence accelerating your business transformation without re-inventing the wheel

Let's start right now and do what is best for your business

- 01** Get Scale and automation while protecting you investment
- 02** Applications modernization with DevOps and Azure massive ecosystem
- 03** Business agility and operational continuity

WHO CAN BENEFIT?

Organizations having invested in VMware in their local datacenter and in their workforce expertise.

Why us? We are Microsoft Gold and VMware Principal partner with a highly skilled and certified team having a huge experience from assessment, to positioning, design and implementation. Proudly recognized as:

- Microsoft Partner of the Year - 2020
Microsoft Partner of the Year - 2018
Microsoft Partner of the Year - 2017
- VMware Services Partner of the year - 2020
VMware Project Delivery Partner of the year - 2019
VMware Professional Services Partner "PPSP" of the year in MENA region - 2017

AVS Use cases

- Data Center Evacuation**
Direct move to Azure without the need to do any migration from Virtual machine perspective.
- Data Center Extension**
Whether using DevOps or production environment extension, AVS can provide this by extending the local datacenter to Azure seamlessly
- Disaster Recovery**
Use a VMware stack deployed in Azure as a primary or secondary on-demand disaster recovery site for your on-premises data center infrastructure.
- Application Modernization**
Use Azure's ecosystem to modernize your applications without reinventing existing VMware-based workloads.
